

STAR POINT BED BUG ELIMINATION & PREVENTION PROGRAM

STAR POINT PREVENTION PROGRAM

Treat the star. *Protect the points.*

STAR POINT is a three-step program for hotels, apartment communities and facilities. It clears an active bed bug infestation, protects the rooms around it, and gives you dated, written documentation from Applied Science Labs for every area treated, even when your own team does the application.

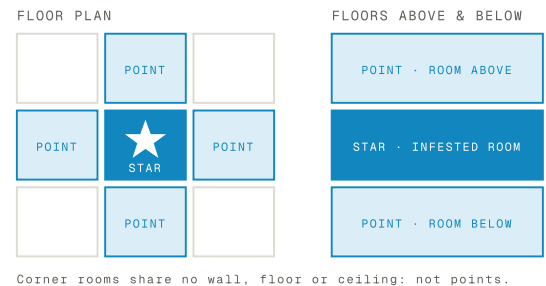

WHAT IT IS BUILT TO DO

01 Eliminate the current infestation	02 Keep it from spreading to adjoining rooms	03 Keep it from coming back	04 Lower treatment costs over time
---	---	--	---

THE STAR PATTERN

The infested room is the **center of the star**. The **points** are every room that shares a wall, floor or ceiling with it.

Bed bugs hide in wall voids and travel along pipes, wiring and outlets, and eggs laid before a treatment can hatch one to two weeks after it. Adults can also go months between feedings. Treating the points means that anything moving next door, above or below meets a treated surface instead of a fresh room.

THREE STEPS

1 **Treat the star, then every point**

Apply VA88 to the infested room first, then to each point, following the label and the For Best Results guide. VA88 kills bed bugs on contact, and the dried film keeps protecting treated surfaces for up to 12 months when used as directed.

2 **Submit a Record of Application**

Complete one Record of Application for each area treated and send it to us. We review every record and, once it is accepted, issue a dated Certificate of Treatment for that area. Review generally takes about 7 business days.

3 **Renew every year**

Before each certificate's 12-month date, re-treat the program areas, ideally during a scheduled deep clean, and submit new records. Each accepted record renews that area's certificate for another 12 months.

Prevention costs less *than cure.*

Clearing an established infestation takes the most time, labor and product. Keeping a protected space protected takes far less. Treat once, document it, and renew on schedule, and you never have to start over from an active infestation.

EVERY CERTIFICATE RECORDS

- ✓ Facility, location and the room, suite or unit
- ✓ The treatment date and the 12-month valid-through date
- ✓ A certificate number you can verify with us
